

Position of a Postdoctoral Research Associate

The DFG-funded cluster of Excellence "Hearing 4 All" has an open post-doctoral position in project "Characterizing central neural speech processing in normal and hearing impaired listeners using machine learning". The aim of the project is to combine neurophysiological measurements (fMRI and/or MEG/EEG) with data driven machine learning to characterize cortical consequences of hearing loss. We offer an international and interdisciplinary research environment and access to up-to-date research facilities.

The position is available from April 1st, 2019 until October 31st, 2022. Salary level German TV-L E13, full time. The payment includes an experience dependent component.

Application deadline is February 27th 2019
