Call for two post-doc positions, Neuroimaging lab, IRCCS Santa Lucia, Rome

Applications are invited for the following positions:

* Postdoctoral Research Fellow to conduct fMRI and EEG studies on human memory, with a specific focus on individuals with highly superior autobiographical memory.

* Postdoctoral Research Fellow to conduct fMRI studies to investigate the effect of cannabinoids on amygdala-hippocampal communication.

Both positions are available starting from January 2022, at the Functional Neuroimaging Lab., IRCCS Santa Lucia, Rome. The positions are renewable for up to 3 years.

Features of a successful candidate:
- PhD in cognitive neuroscience, experimental psychology, or related disciplines;
- Experience with fMRI and/or EEG data analyses;
- Proficiency in programming experiments (e.g., Psychtoolbox, PsychoPy, Presentation);
- Proficiency in statistics and statistical analysis tools (e.g., R, MATLAB, SPSS);
- Ability to properly report, organize and publish research reports;
- Ability to conduct research independently;
- Strong publication record.

To apply for either position, please submit a CV and contact information of two referees to Prof. Valerio Santangelo, valerio.santangelo@unipg.it
